PHP my admin page:

The screenshot shows the phpMyAdmin web interface. On the left is a sidebar with a tree view of databases and tables. The main area displays the 'students' table from the 'school\_db' database. A green status bar at the top of the main area indicates that 5 rows are shown (rows 0-4) and the query took 0.0001 seconds. Below this, the SQL query 'SELECT \* FROM `students`' is shown. A toolbar with various icons (Browse, Structure, SQL, Search, Insert, Export, Import, Privileges, Operations, Tracking, Triggers) is at the top. Below the SQL query, there are options for 'Show all', 'Number of rows' (set to 25), 'Filter rows' (a search box), and 'Sort by key' (set to None). A table of student records is displayed below these options. The table has columns for 'id', 'name', 'email', and 'course'. Each row has a checkbox for selection and icons for 'Edit', 'Copy', and 'Delete'. At the bottom, there are options for 'Check all', 'With selected' (with 'Edit', 'Copy', 'Delete', and 'Export' icons), and another set of 'Show all', 'Number of rows', 'Filter rows', and 'Sort by key' options.

Server: localhost > Database: school\_db > Table: students

Showing rows 0 - 4 (5 total, Query took 0.0001 seconds.)

`SELECT * FROM `students``
